

MultiAge

Multilingualism and Ageing

We want to understand how older bilingual adults speaking Mirpuri–Pahari–Pothwari and/or Panjabi/Punjabi, and living with cognitive impairment use their languages and switch between them.

-  Are you:
60–75 years old?
-  a speaker of English and Mirpuri–Pahari–Pothwari and/or Panjabi/Punjabi?
-  living with cognitive impairment?
-  willing to share about 2.5 hours in person at a location of your choice, to help scientific research and receive £25 cash?

Please scan QR code, email or call to express interest and learn more.
